ABOUT US

JanYu Technologies Pvt Ltd is a company incorporated with the primary objective of providing Portable Mobile Field Robotic & Remotely operated solutions and services to improve productivity in Non-Conductive work environments; Industrial Automation and Robotic solutions for better productivity and quality of production coupled with Production Data Management.

Concrete test cube making machine is a mechanized, portable system for making Concrete Test Cubes of desired size and volume, per batch, for mandatory testing purposes, following proper standards of Tamping.

**Quality product.
Quality Service.**

FEATURES

- High load formation capacity
- High strength
- Robust design
- Time-saving
- Hassle free functioning
- Durability
- Long lasting
- Optimum performance
- Quality approved
- High strength of blocks
- Customizable
- Quick and accurate
- Environment –friendly
