

Spearheading Robotic
Revolution

About Us

Janyu Technologies has in its Management and Engineering team, an experience of more than 30 years into Automation, Robotics, Textiles, Defence Electronics and Telematics.

The company has developed expertise in engineering and technology, procurement and project management, construction and commissioning, with a strong command over asset management. To overcome this situation we have come up with an idea for SOLAR PANEL CLEANING ROBOT which will help in cleaning and maintaining solar panels such that it can trap sunlight and produce solar energy without any disturbance.

Solar Panel Cleaning Robots

Features

- Tractor Mounted System
- Mobile Unit
- Excellent performance and efficiency
- Rugged, Robust & Modular Design
- Synthetic Microfiber fabric
- Self-guidance on alignments
- Automated Smart Cleaning of solar
- Dry & wet cleaning options

HIGH QUALITY

We place a high value on providing the highest quality cleaning to our valued customers.

GREATEST SERVICE

SOLAR PANEL CLEANING ROBOTS

THE FOLLOWING SECTORS ARE IN FOCUS:

- Industrial Automation with a specific focus on Flexible Automation
- Defence, Space and Industrial applications.
- Oil & Gas
- Chemical & Processing Industry
- Renewable Energy

Our Solar Cleaning Robot is a water-free cleaning system, meaning that your site not only avoids the cost of water, but also the infrastructure that supports it, be it tanker trucks, storage containers, hoses and piping.
